

NEXGEN SOLID SURFACES

BY
KORDURA

Experience the Future of Solid Surface - Stronger, Sleeker, and More Stylish

Designed for Durability, Crafted For Elegance: A New Era in Solid Surface

Advancements in material engineering have led to the development of next-generation solid surface materials that exhibit higher density and hardness compared to traditional options.

These materials are often produced using advanced compression molding techniques, which enhance their structural properties.

KORDURA®
NEXGEN SOLID SURFACES

Versatile & Practical

With its cutting-edge technology and ready-to-install convenience, this next-gen solid surface is transforming the way professionals design and install premium surfaces—delivering effortless beauty with maximum performance.

Available in 20mm and 25mm thicknesses, providing robust support and a substantial feel for countertops

Applications

Ideal for countertops, vanities, bar tops, tabletops, and wall cladding.

This revolutionizing high density, ready to install material offers unmatched durability, luxury aesthetics, and seamless installation with no need for secondary fabrication. Designed for both residential and commercial applications, this 20mm & 25mm thick solid surface provides the perfect balance of strength, beauty, and convenience.

Perfect combination of
Elegance, Luxury & Durability

Introducing our Next-Generation Solid Surface Material—a 20/25mm thick, silica-free innovation that offers superior density and hardness compared to traditional solid surfaces. Expertly engineered through advanced compression molding techniques, this material provides enhanced durability and a more realistic marble veining, making it an ideal choice for kitchen and bathroom countertops.

With its cutting-edge technology and ready-to-install convenience, this next-gen solid surface is transforming the way professionals design and install premium surfaces—delivering effortless beauty with maximum performance.

Heat, Stain & Scratch Resistant

Designed to withstand everyday wear and tear in both residential and commercial spaces.

Ultra-Dense & Impact-Resistant

Engineered for high durability, outperforming traditional solid surfaces.

Silica-Free Composition

A healthier, safer material for fabricators and end-users.

Seamless Integration

Designed to withstand everyday wear and tear in both residential and commercial spaces.

Pre-Finished & Ready to Install

No additional fabrication or lamination required, reducing labor time and costs.

Bold, Natural Veining

Stunning Calacatta-style aesthetics for a premium look.
